DETAILED ACTION

Applicant's amendment filed August 17, 2005 has necessitated the restriction which follows.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 3-12, drawn to a composite concrete pavement, classified in class 404, subclass 27.
- II. Claims 13-16, drawn to a composite pavement, classified in class 404, subclass 17.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a pavement in which aggregate coarser than 4.75 mm does not exceed one-third of the total aggregate weight, for example. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
